## JULY/AUGUST 1983

### WELCOME BACK MAJOR LEAGUE BASEBALL !

And welcome back all of our favorite teams to the Satellites again !

This is WESTSAT's 3rd annual Major League Baseball Guide - your personal schedule of those games that are televised back to the visiting teams' home cities. Yes, there's a lot of baseball up there on satellite as you'll find out going through this guide. But keep in mind that not all televised games are relayed back to the old home town simply because certain distances and other limiting factors don't warrant the use of satellite transmission. These particular games are marked with a rather humble "one-star" rating. A "two-star" game is a 50-50 chance, a coin-toss. Three stars, and you can be pretty well assured the game will be up there, about an 80%'er. Four stars? Pour yourself a tall cool one, kick back in your easy chair and settle down in front of the tube for 9 innings of assured baseball — a 99% certainty the game will be via the bird.

It should also be pointed out that depending on how well some teams are doing in their respective standing for the pennant race, more games may be added to home televised schedules as the season progresses. A certain portion of these games will be carried via satellite.

Games are listed in **EASTERN TIME and PM** only (subtract for your local time zone), followed by the "likelyhood" that the game will be available via satellite, then followed by order of "most-likely-satellite."
